

350!

Join the **Amazing Waving Human Tide Line**

350 FOR A SAFE CLIMATE FUTURE

**INTERNATIONAL DAY
OF CLIMATE ACTION**

OCTOBER 24, 2009

3 PM - MANHATTAN BEACH PIER

Climate change is already happening and now puts our childrens' future at great risk. We must reduce the CO₂ in our atmosphere to 350 ppm to avoid the worst impacts to their health, safety & quality of life.

We can do it if we wake up and start today. Bring your family and friends & be part of the Amazing Waving Human Tide Line. Let our leaders know we need serious climate action now.
